## **JACKIE GIBBS**

Jackie, a senior student at Sam Rayburn, has maintained an active interest in the Vocational Agriculture Program during his four years of High School

He has served his local chapter of FFA as vice president for the past two years, demonstrating qualities of leadership and dependability

Jackie is especially proud of his herd of registered Brahman cattle that he is raising as part of his supervised vocational program. He has exhibited these cattle successfully at livestock shows throughout the area

## **PAULA RICHARDSON**

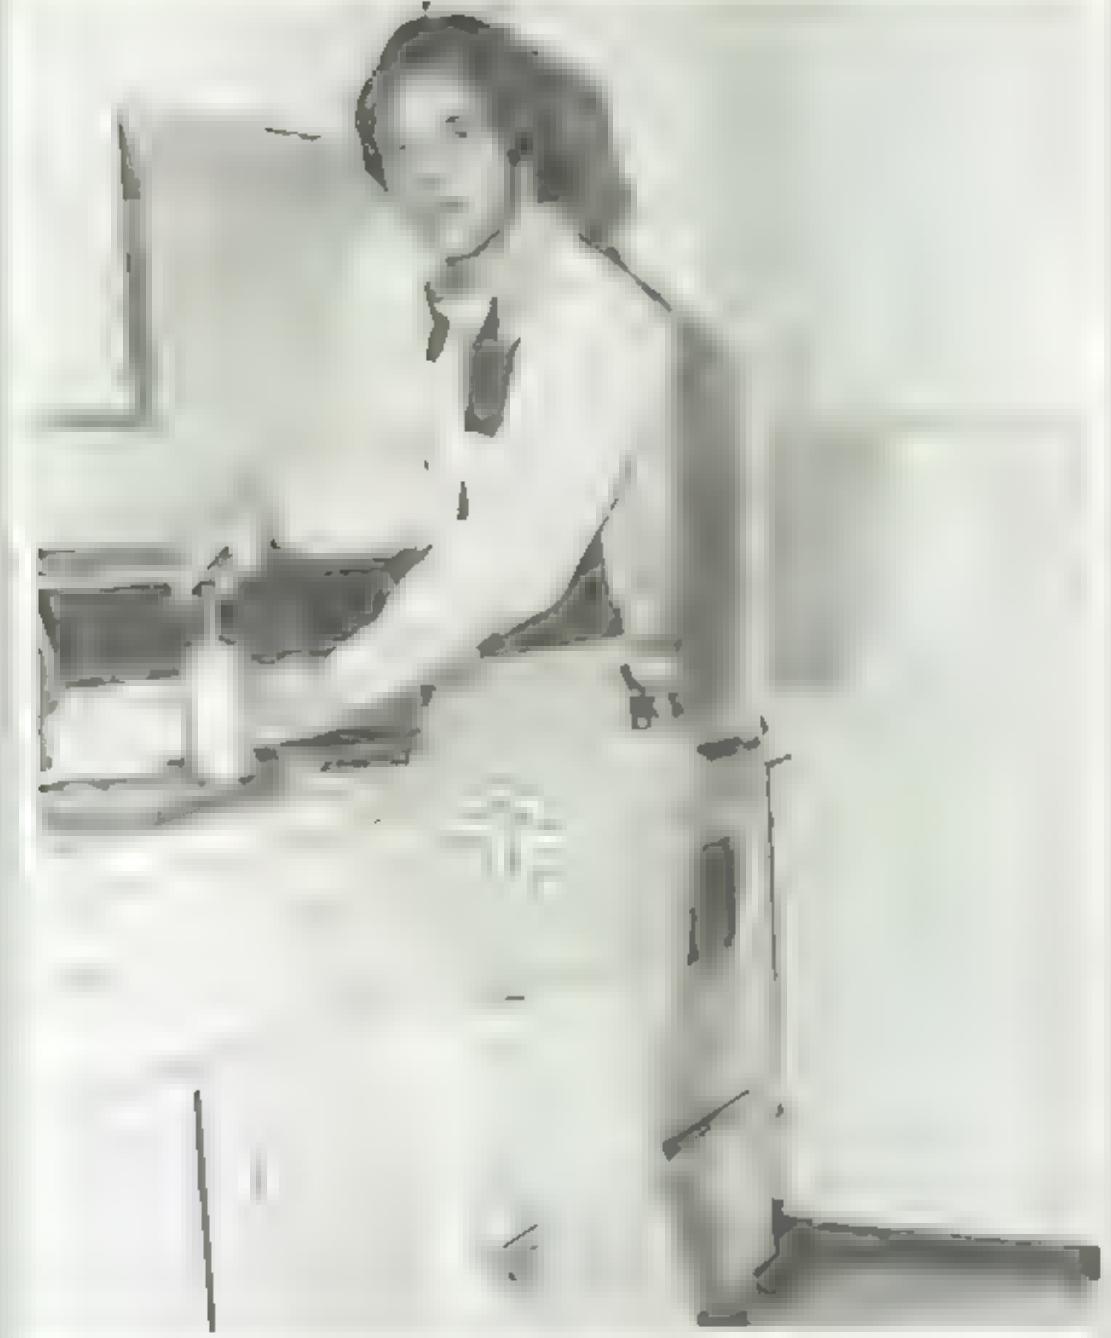

Paula has been involved in the Vocational Homemaking Program during her Freshman and Sophomore years at Sam Rayburn High School.

She has developed leadership ability to the extent that she often takes special assignments in helping other students in a classroom project situation

An especially gifted seamstress, Paula's talent for sewing has drawn favorable comment from her supervisor and classmates alike, and has been of monetary value to her as she is frequently asked to sew for others outside of school

I know Noyes & his Patti now it's off to see him + Home, and student body is very good. Noyes is a tall Rose at 6' 3" he is red, brownish hair & has a very nice face with dark brown eyes with light brown hair. He is a good boy. And last night I saw Fornier & he is a good boy too. Patti is very pretty but no always the best of character yet, I seen Mark Johnson and Mark Isa, go trap them down at camp.

## FACULTY

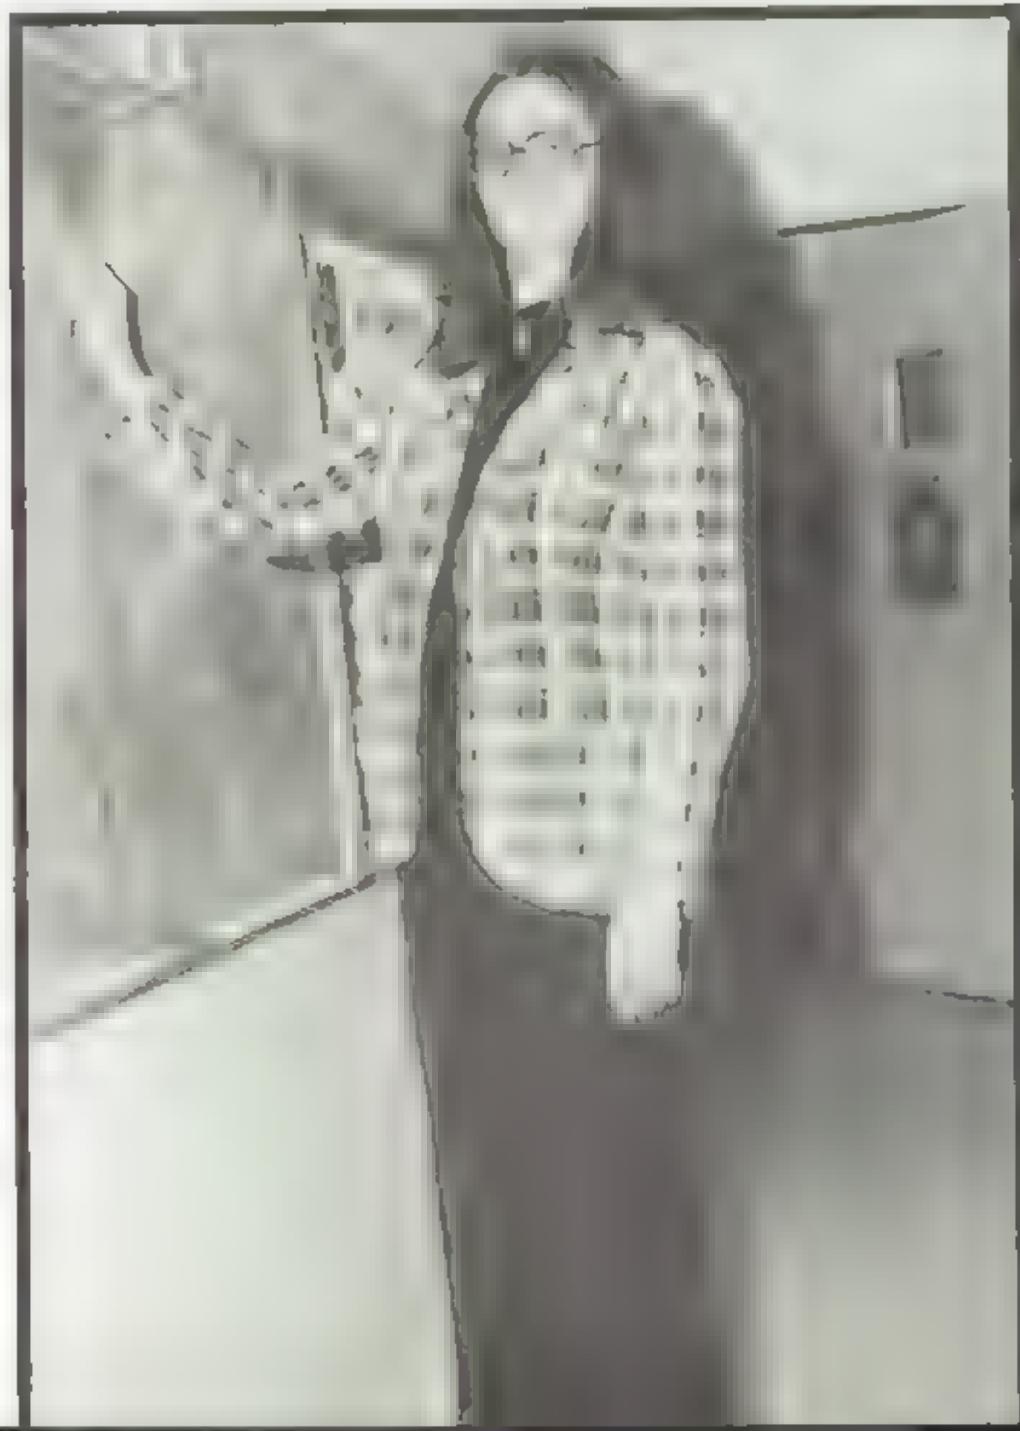

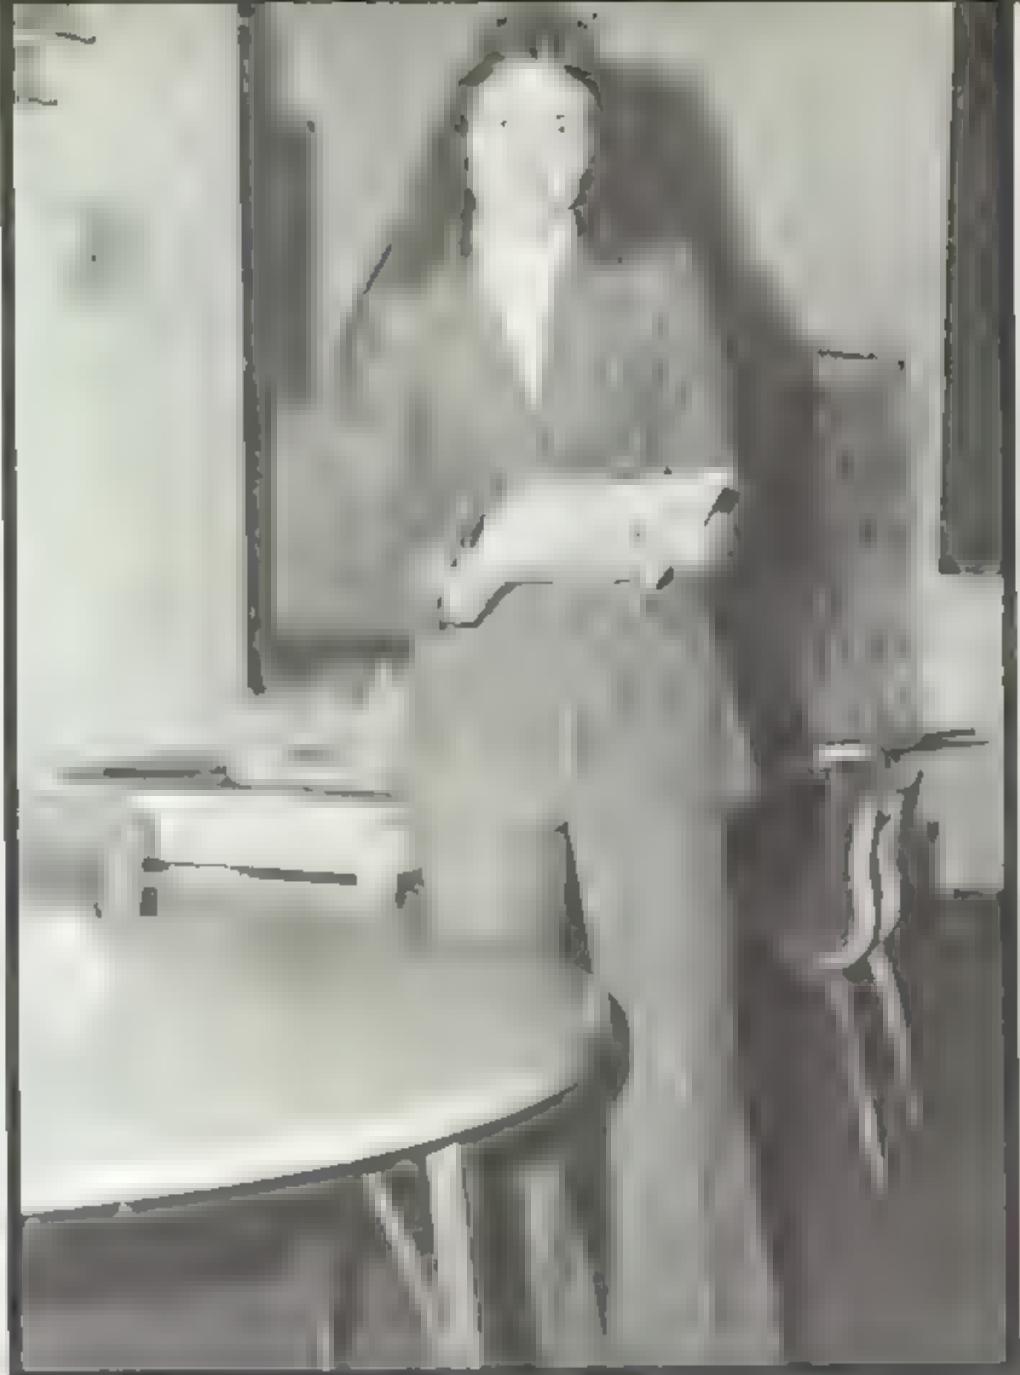

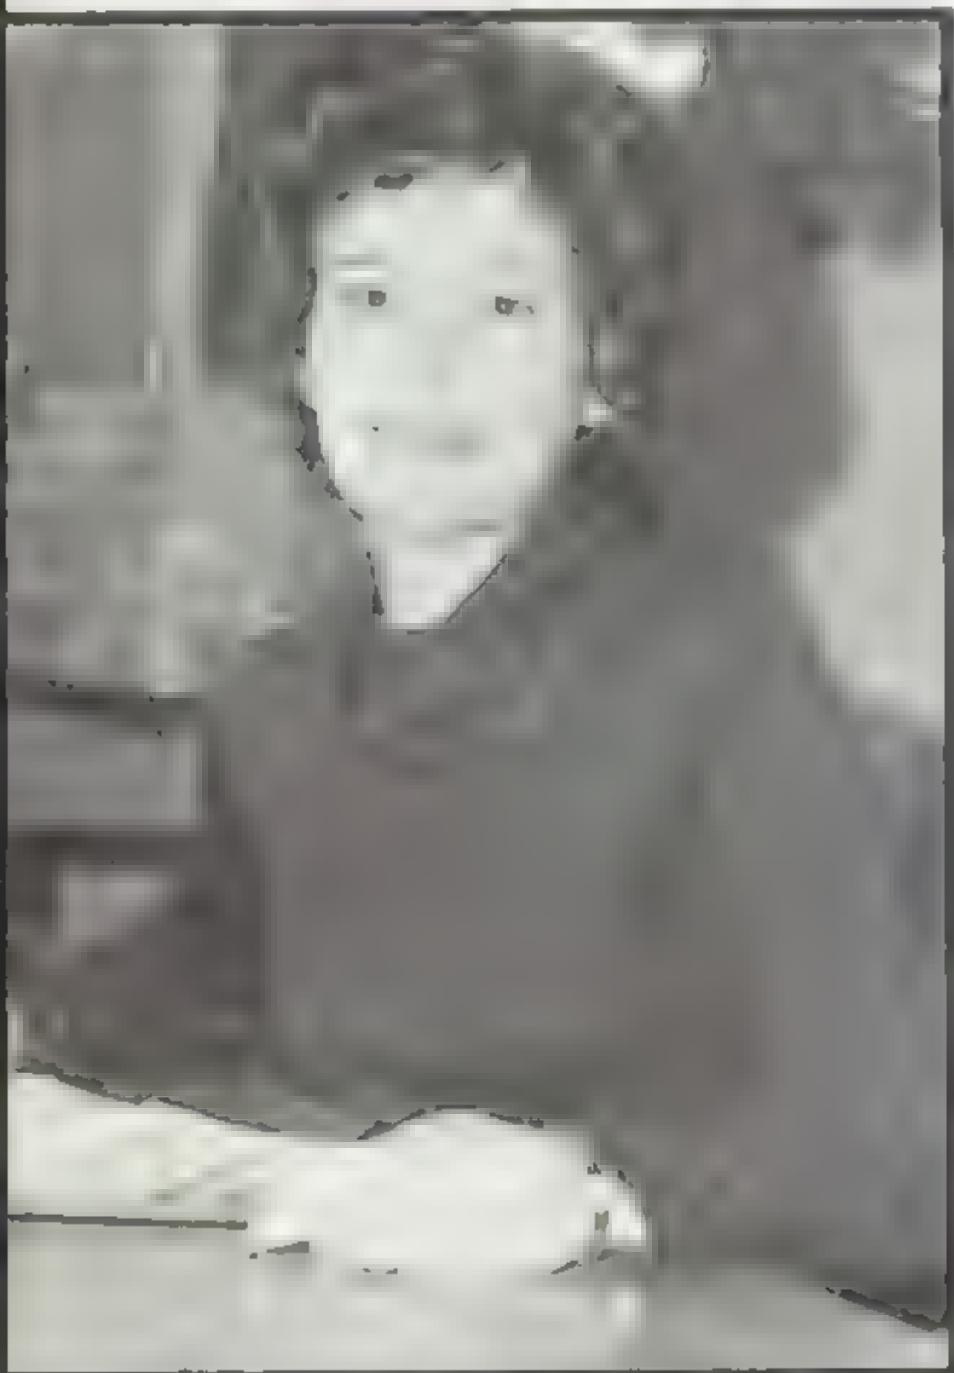

## **TEACHERS ARE PEOPLE**

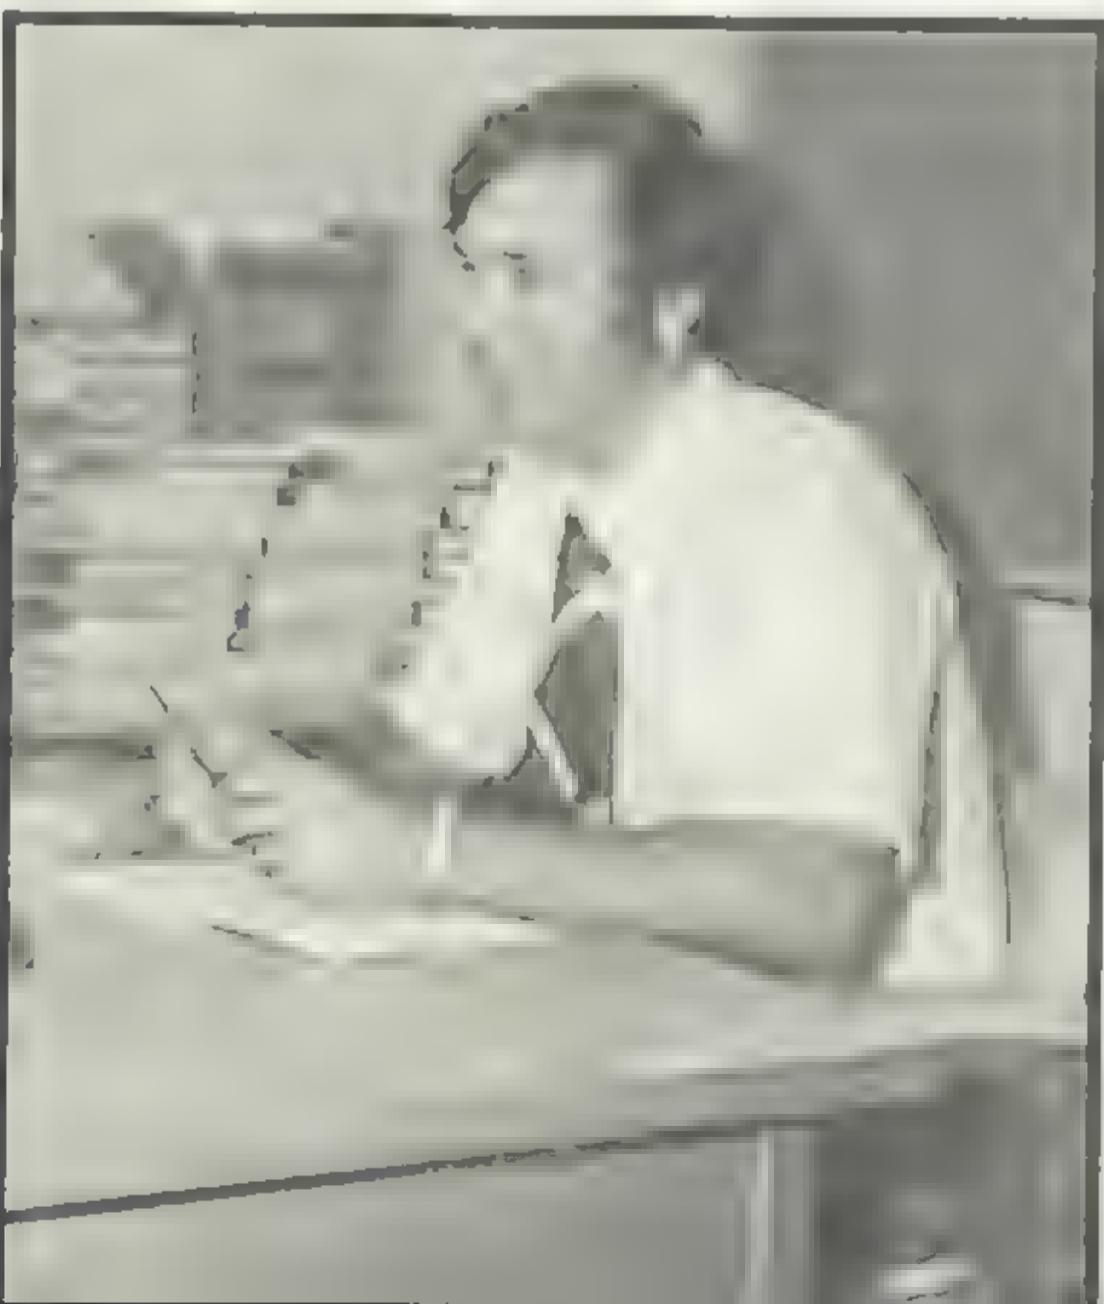

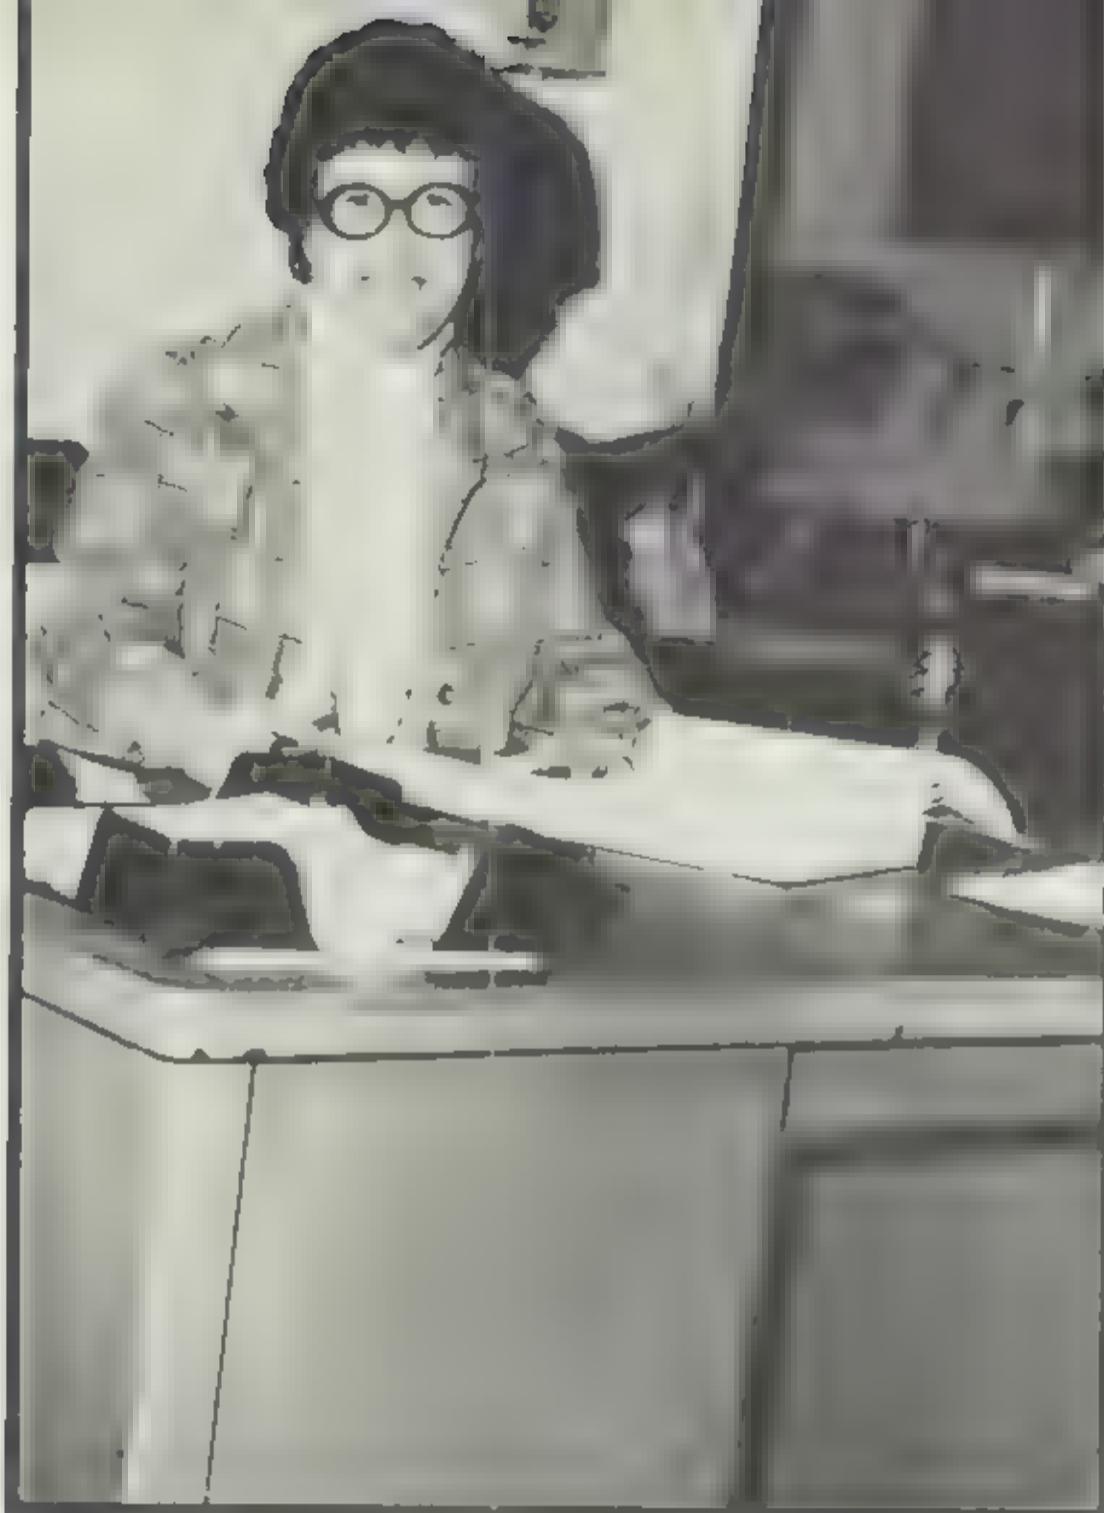

It is sometimes difficult for students seated in a classroom to think of a teacher as anything other than a teacher. But the person making that assignment, holding that grade book, or writing on the chalkboard does have a life outside of school.

Teachers dread Monday mornings, feeling disappointment on "snow days" and look forward to Fridays.

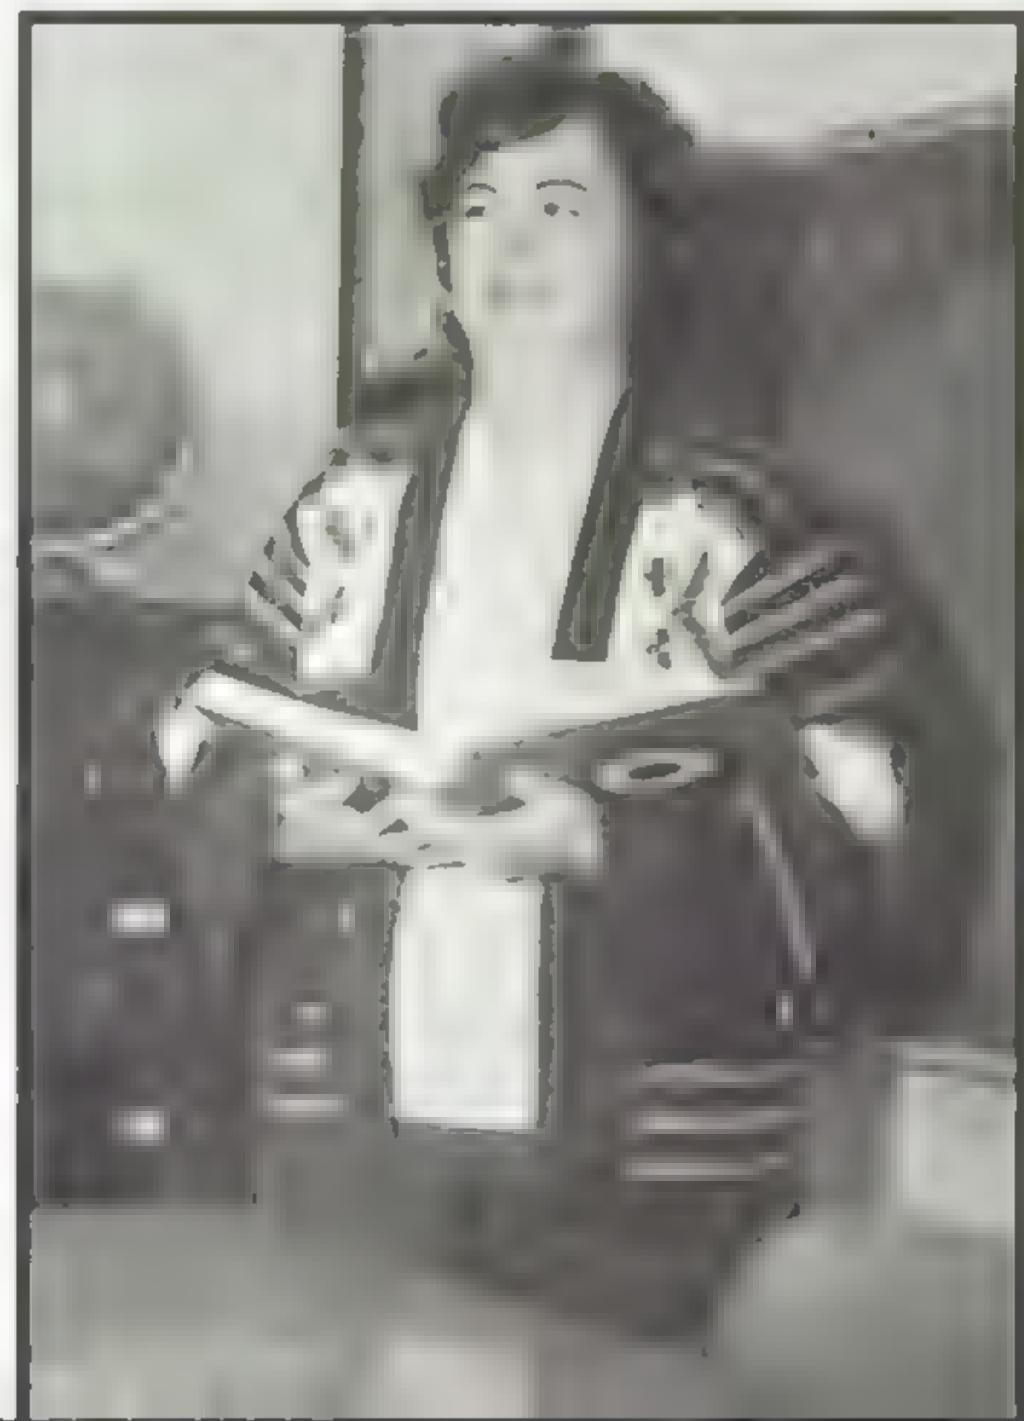

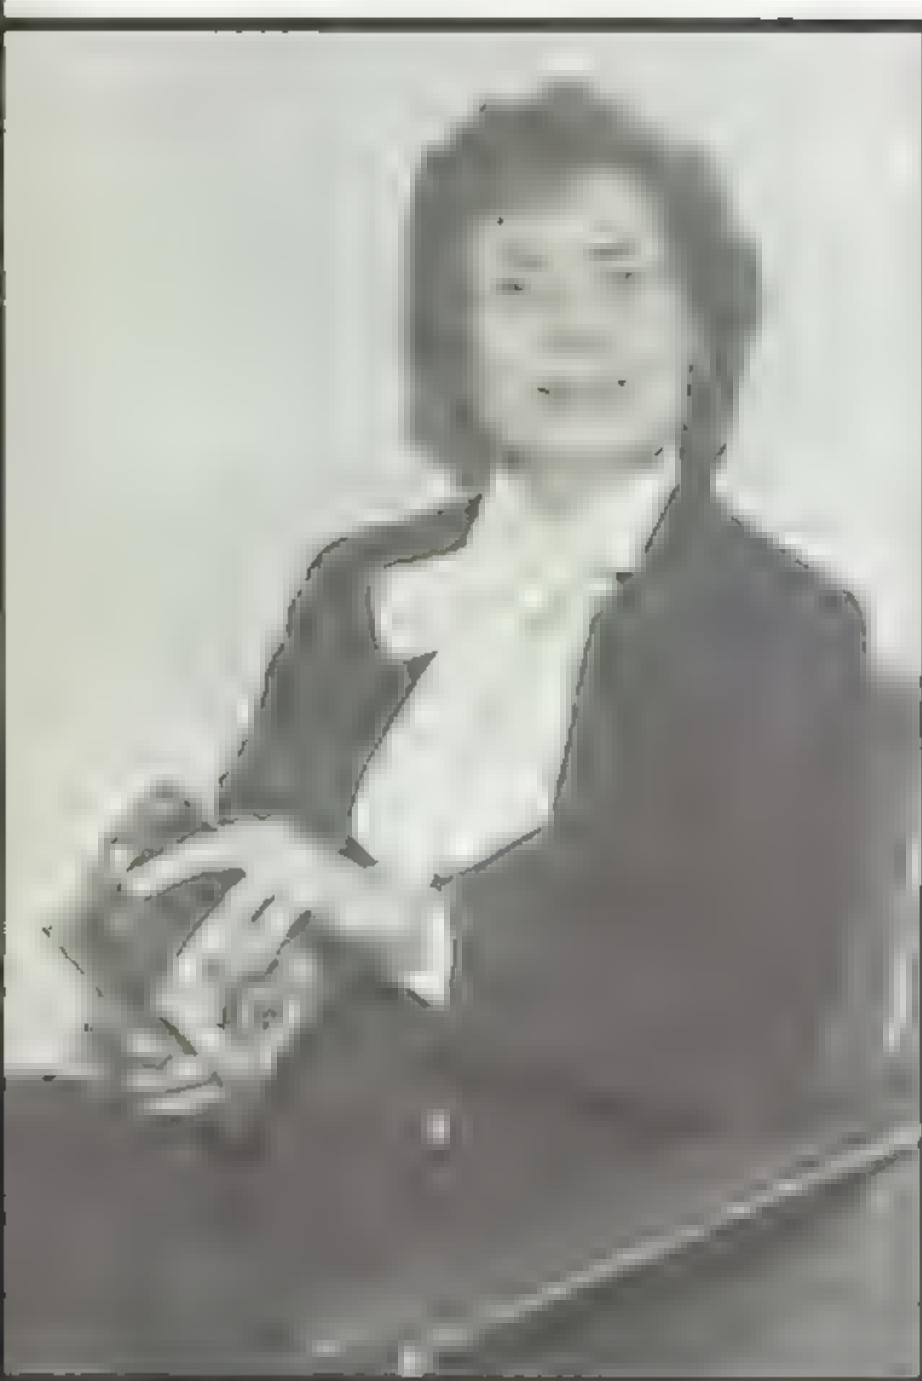

Teachers do not enjoy dealing out F's or giving students a bad time.

**TEACHERS ARE PEOPLE** trying to do their jobs as best they can.

# SAVING TIPS on electric air conditioning

#### Central Systems

1. Set thermostat on 78°, or higher
2. Have equipment checked seasonally by qualified serviceman
3. Check filter every 30 days. Clean or replace when dirty
4. Keep furniture, draperies away from air outlets and returns. Clean grills often
5. Close draperies and blinds to keep out sunlight
6. Keep fireplace damper closed
7. Proper home insulation keeps heat out cuts energy use
8. Weatherstrip doors and windows. Caulk cracks
9. Keep windows closed. Open outside doors as little as possible

#### Window Units

**Follow above suggestions, plus these:**

10. Buy units with highest "energy efficiency ratio" (EER). If EER is not on sales tag, ask for it or figure it yourself. Divide "wattage" into "BTU" capacity
11. Place unit where it'll get as little direct sun as possible
12. Aim air outlets at lower half of doorway to next room to allow warm air from that room to enter at the doortop for recooling, recirculation
